

RESPONSIBLE MEETINGS

Our commitment to responsible business means that we strive to influence, encourage and assist our management, employees, delegates and suppliers alike to minimise and compensate for our direct and indirect ecological and carbon footprint, so that we can leave a positive legacy.

Specifically, our responsible meetings commitments are:

- To minimise the consumption of natural resources and the production of excess water, waste and energy related to the planning and execution of each conference, meeting or event
- To improve our overall Carbon Footprint through reduced overall carbon emissions and improved Responsible Business practices
- To offset all CO2 emissions related to travel to and participation in the conference, meeting or event by employees and sponsored guests
- To encourage our suppliers and contractors to adopt overall Responsible Business and Carbon performance practices
- To assist our employees, delegates, partners and visitors to minimise the overall ecological and carbon footprint of conferences, meetings and events
- To foster actions that avoid harm to biodiversity and human health
- To evaluate our progress and report our successes to stakeholders and the general public
- To improve the wellbeing of both the local community and the natural environment in which we operate
